

## Two strong partners for you

### SMARTCRM and MAJESTY

The competition for customer satisfaction requires perseverance. This leads primarily in sales and after-sales departments to increase pressure on all that are involved. The mass of customer-related information grows as does the challenge to provide them to the different corporate departments and prepare them meaningfully - and without much time. In addition to the quality requirements of the customers, the speed of the market increases. In order to act in a targeted manner, the closest possible cooperation is essential.

We put this knowledge into practice with the company UB-Software GmbH.

The interface between SMARTCRM and MAJESTY connects many information categories that are needed on both sides: master data of customers and products, current figures for sales and order volumes, temporary valid information on discount actions, etc. These data are the basis for a full panoramic view for all customers and planning related issues. SMARTCRM accesses the data available in the ERP system and connects them

with the relevant customer or prospect data. Thus, field service and office associates see the current sales revenue and sales trends and can react accordingly to changes. Many evaluations and planning possibilities within the CRM system achieve a significantly higher level and so gain automatically in quality.

Take advantage of the over 20 years' experience as a CRM manufacturer for your sales power:

- Address and activity management
- Mapping of relationships between addresses
- Centralized appointments and task management, planning of visits
- Convenient quotation writing and quotation tracking
- Personalized mailing / serial e-mails
- Clear analysis, target definition, plus-minus lists
- Machines master data and service history

### SMARTCRM.ERP.MAJESTY

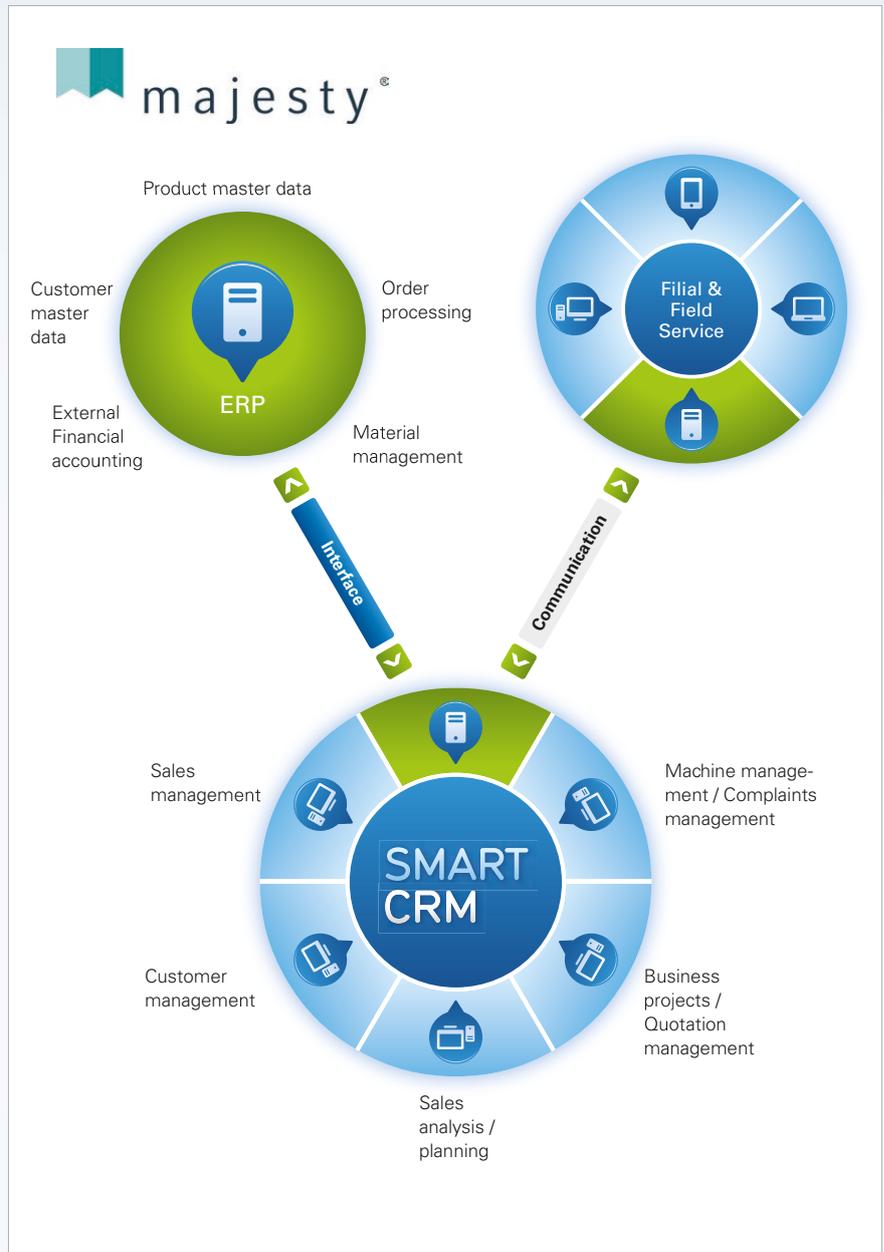

With SMARTCRM.ERP.MAJESTY, you combine the powerful features of both systems. Any data can be read from the MAJESTY using the configurable and customizable interface, such as:

- Clients
- Addresses
- Contacts
- Product master data
- Quotation as PDF-file / Quotation positions
- Sales, contribution margin
- Order on hands, incoming orders
- Open positions
- Any individual tables, e.g., Discount prices

### This is how the data flow works

Data synchronization between SMARTCRM and MAJESTY is run on a regular basis:

- The prospect are entered and maintained in SMARTCRM. Should a prospect become a customer in SMARTCRM, the system transfers the data to MAJESTY at the press of a button and receives there immediately the new customer number. Then the customer data are transferred to SMARTCRM.
- If you need, for instance, to correct an address, you have to do in only one of the system. The modification is made via the interface in each system automatically.
- The quotations created in MAJESTY can always be transferred to SMARTCRM, for instance as a PDF file, including the detailed positions. So the different quotation phases are completely traceable in the CRM system and a clear quotation tracking is guaranteed in SMARTCRM.
- The data from MAJESTY are also available in SMARTCRM offline. No matter if you are on the go, working from home or working in a filial: you are always integrated in the communication flow between CRM and ERP worlds.

### About SMARTCRM

Since 1992, SMARTCRM GmbH is successful with its own development for sales, marketing and service. The company offers with the eponymous product SMARTCRM a complete CRM solution (Customer Relationship Management).
