Back office

- Timely data availability for the back office

Data Exchange

- Data exchange per e-mail or VPN

Customization

- Free definition of data exchange conditions

Data security

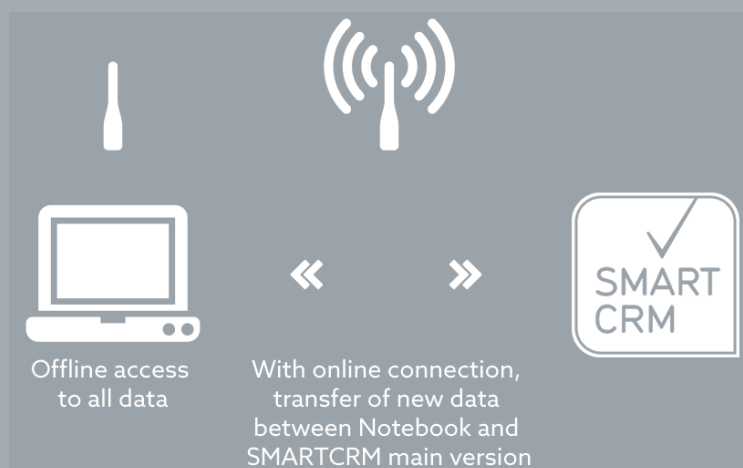

- Compressed and encrypted data exchange packet

No Internet, no problem – Thanks to offline CRM

With us, you have your CRM always with you – no matter where you are.

On the roads and no Internet connection? With SMARTCRM.Offline, this is not relevant anymore. No matter where you are, you are always informed.

Back online later? As soon as an Internet connection is available, the new information is transmitted to your SMARTCRM main installation.

See our CRM system live – free of charge and non-binding directly on your screen:
